CLIENT & PROJECT DETAILS

Pre-demonstration site intake

Share the site conditions and project requirements so our team can plan a safe, productive LiDAR capture.

PURPOSE This form collects project details and environmental conditions for the planned site visit.

01 Site overview

Company name

Site name

Site location (address & city)

Your name and contact information

Today's date

02 Project overview

Project objective(s)

- [ ] Aerial LiDAR
- [ ] Handheld LiDAR
- [ ] Other

Requested dates onsite

Preferred date(s) / alternate dates

Deliverables: Lidar.Rentals will provide a technical report, point-cloud files and onboard video where available. The report is targeted within 10 business days of the site visit.

TRAVEL, ACCESS & SAFETY

Logistics overview

Trip planning and non-technical requirements for the site visit.

03 Travel & accommodation

What is the closest airport to the site?

Will transportation from the airport to site be provided by the mine site?

☐ Yes ☐ No

Method of transportation

Can visiting Lidar.Rentals representatives stay at the onsite camp?

☐ Yes ☐ No ☐ N/A

If no, recommended nearby accommodations / hotels

04 Site access & PPE

Maximum number of Lidar.Rentals representatives allowed onsite

Is a site induction required? If yes, how long will it take?

☐ Yes ☐ No

Induction duration and other required training / qualifications

PPE required onsite and PPE not provided by the site

ENVIRONMENTAL & DATA REQUIREMENTS

Technical information

Provide as much detail as possible about underground conditions, areas of interest and expected data workflows.

05 Site conditions

Can you provide a 2D line drawing of an area of interest, including dimensions?

☐ Yes ☐ No

Can you provide photographs of the area(s) of interest?

☐ Yes ☐ No

Dust levels (PPM) and how dry is the environment?

Relative humidity underground (%)

Ambient temperature underground and temperature range at area of interest (include units)

Site elevation (include units)

06 Survey & data workflow

Survey markers / stems used onsite (make, model or product URL)

Software expected to import the point clouds

Desired point-cloud file type(s)

Can equipment connect to the internet onsite? Are IT controls restricting access?

☐ Yes ☐ No ☐ Restrictions

AERIAL LIDAR PLANNING

Aerial capture details

Complete this section when an aerial LiDAR system is planned for the demonstration.

ATTACHMENTS Please include available drawings, dimensions and site photographs with the completed form.

07 Flight area & underground conditions

Minimum clearance in the drift, stope and/or raise (include units)

Example: 3 × 3 × 3 metres or 9 × 9 × 9 feet

Depths at which the aerial LiDAR system is expected to operate (include units)

Wind conditions underground

Can active ventilation be reduced or shut off briefly?

☐ Yes ☐ No

Pooled or dripping water in expected flight areas (depth, clarity, extent)

Are there closed-chamber stopes with bottom-only access that may accumulate condensation or suspended dust?

☐ Yes ☐ No

Is there a nearby underground location to recharge batteries and tablets?

☐ Yes ☐ No

THANK YOU Please return the completed form to your Lidar.Rentals contact or use the contact options at lidar.rentals.
